SUSTAINABLE MISSION
Making a sustainable difference in Mission, Kansas
The U.S. Green Building Council (USGBC®) and its community are changing the way buildings and communities are designed, built and operated. We believe in better buildings; places that complement our environment and enhance our communities. Places that give people better, brighter, healthier places to live, work and play.
GREEN BUILDINGS FOR EVERYONE WITHIN THIS GENERATION
MORE THAN
90,100
TOTAL LEED® COMMERCIAL PROJECTS COMPRISING OVER
17.1 BILLION SQUARE FEET
OF CONSTRUCTION SPACE
Progression of LEED
LEED v4 is the newest version of the world's premier benchmark for high-performance green buildings. This version is bolder, more specialized, and designed for an improved user experience. LEED v4 encourages and accelerates global adoption of sustainable green building and development practices through the creation and implementation of universally understood and accepted tools and performance criteria.
