

# IKE AND LETTY EVANS ACADEMIC SUCCESS CENTER LIGHTING THE WAY FOR SUCCESS AT K-STATE AND BEYOND

College is a time of great opportunity — a chance to find direction in life and chart a course for the future. For many students, however, college can also be a completely daunting experience. It's easy to feel overwhelmed by managing schedules, finances and academics all alone for the very first time.

The Carl R. Ice College of Engineering at Kansas State University forges relationships with these students through the Ike and Letty Evans Academic Success Center (ASC). Our vision for this program is very simple — we will

provide students with mentors, advisers and training needed to light their way for a successful college and career path. Because of the tremendous value in relationships and finding direction early in life, the Carl R. Ice College of Engineering invites your investment in the Ike and Letty Evans Academic Success Center.

Your investment will give engineering students access to multiple training opportunities and support groups under a single umbrella of programmatic support.

## SCHOLARS ASSISTING SCHOLARS

Scholars Assisting Scholars (SAS) is a highly focused tutoring program that employs students to attend a specific section of a course and serve as a tutoring resource to everyone enrolled in that section of the course. Tutors attend the lecture and provide assistance consistent with course instruction and lead review sessions before each exam. SAS is designed to support student success and learning for students in the early chemistry, physics and math courses, as well as many other core engineering courses.

## ALUMNI MENTOR PROGRAM

The Alumni Mentor Program (AMP) is aimed at connecting current engineering students with alumni. Students are matched with a mentor based on background, experience and interest. This nine-month program (September–May) is designed specifically for engineering students with sophomore standing or above.

## ACADEMIC ADVISING

The first-year general engineering academic advising program provides support, connection and resources to students in the general engineering program, assisting them to select a degree program and accomplish their academic and career goals. This includes seminars and instruction to help students establish effective study skills, time management and problem-solving practices. Advisers also direct learning communities, both residential and non-residential for general engineering students.

## FIRST-YEAR INSTRUCTION

Some freshmen pursuing an engineering degree are unsure about which degree program will best fit their interests, skills and career goals. In order to fully engage these highly capable and interested students, the Ike and Letty Evans Academic Success Center offers the first-year general engineering program. Students receive detailed insight through its Engineering Orientation course, DEN 160. In addition, they participate in the Engineering Problem Solving course, DEN 161, which provides a research-based learning environment to help them achieve academic success.

After completing the First-Year General Engineering Program, students can easily transition into the Carl R. Ice College of Engineering degree program of their choice and stay on track with their peers. The first-year general engineering program provides students with a perspective of the various types of engineering challenges and career paths, developing a strong foundation for personal and professional development.

## DIVERSITY SUPPORT PROGRAMS

The **Women in Engineering Program (WiE)** provides events and activities offering social engagement, professional development and academic support for women in the college. Social networking and engagement activities are provided through WiE mentors and departmental associations. Women mentors and leaders in the college create and plan many of the activities. The Women in Engineering Laboratory Experience program also supports women working in engineering labs throughout the college.

The **Multicultural Engineering Program (MEP)** is focused on increasing the pool of interested and qualified students from historically under-represented groups pursuing engineering degrees and to provide a foundational support system. The MEP Kompass summer bridge program is a three-day intensive session designed to accelerate academic success for incoming freshmen. The Multicultural Academic Program Success (MAPS) six-week summer program allows students to get to know other students, faculty and the K-State campus. MAPS participants also get to experience industry tours and meet professionals and faculty who can serve as mentors for them throughout their college careers.

# Investment opportunities

Your investment in the Academic Success Center strengthens our efforts to help future graduates succeed.

## SCHOLARS ASSISTING SCHOLARS

Your gift allows us to continue improving the college's freshman-to-sophomore retention metric, and hence, move the college toward achieving academic excellence in all its endeavors.

*Expendable gift of \$10,000/yr. for three years or*

*Endowment gift of \$250,000, payable through pledge of up to five years*

## ALUMNI MENTOR PROGRAM

Your investment provides students an opportunity to learn from highly successful and experienced professionals in their field of study who share their technical expertise, facilitate career development and give professional advice.

*Expendable gift of \$10,000/yr. for three years or*

*Endowment gift of \$250,000, payable through pledge of up to five years*

## FIRST YEAR ADVISING

Your investment provides first-year general engineering students with academic advising to support and guide their selection of a degree program as well as assisting with skills needed for academic success.

*Expendable gift of \$10,000/yr. for three years or*

*Endowment gift of \$250,000, payable through pledge of up to five years*

## FIRST-YEAR INSTRUCTION

Your investment gives students detailed insight into different career possibilities across our 11 different engineering degree programs through an engineering orientation course.

*Expendable gift of \$10,000/yr. for three years or*

*Endowment gift of \$250,000, payable through pledge of up to five years*

## WOMEN IN ENGINEERING PROGRAM

Your investment provides opportunities for women in engineering to connect, share and support each other during their time at K-State.

*Expendable gift of \$10,000/yr. for three years or*

*Endowment gift of \$250,000, payable through pledge of up to five years*

## MULTICULTURAL ENGINEERING PROGRAM

Your investment helps encourage and support interested and qualified engineering students from historically under-represented groups.

*Expendable gift of \$10,000/yr. for three years or*

*Endowment gift of \$250,000, payable through pledge of up to five years*

## Join us!

You can become part of our exciting future. We invite you to contact a member of our development staff today and begin the discussion about how you can make a difference.
